SUNNY TRIPOWER CORE2

Ultimate flexibility and integrated features for maximum yields

More options.

- + Most flexible system design for commercial and large commercial solutions, for both ground mount and rooftop systems.

More integration.

- + Core part of SMA Energy System Business and ennexOS, ready for future business.

More performance.

- + Out-of-the-box solution with integrated PV performance optimization ensures efficient installation and service.

+ More options.

Ultimate flexibility in system design. Up to MW range.

- Best in class: 12 MPP trackers for maximum design flexibility
- 24 strings with Sunlix connectors
- Up to 150% oversizing of PV array
- Up to 1,100 VDC
- Bifacial modules supported

+ More integration.

Ready for all future needs

- Leading planning tool SUNNY DESIGN
- Seamless extension for further use cases, for example, storage solutions like STORAGE BUSINESS
- Complete ennexOS integration and easy plant commissioning via DATA MANAGER M and monitoring with SUNNY PORTAL
- SMA services (online service center, Smart Connected)

SMA Energy System Business

+ More performance.

Installation concept saves time and money

- No DC Combiner required
- Best in class: 110 kW with standard 400 VAC
- Multiple handling grips
- High environmental resilience
- Fast plant commissioning (with Data Manager M)

Integrated features

SMA ShadeFix is an overall solution from SMA that optimizes the performance of PV systems at string level in every situation. Even in shading. SMA ShadeFix outperforms most conventional hardware solutions for shade management in PV systems.

Automated inverter monitoring optimizes services and delivers highest yields.
